LipoCure Introduces SetWeight4Life — A Solution to Never Having to Diet Again

For Immediate Release

SAN FRANCISCO, February 10, 2010

LipoCure, LLC will launch a unique new program on March 25, that is designed to help people maintain a healthy weight for life without dieting.

The program is based on MIT's Medical Set Point Theory and Dr. Norman Easley's clinical Physiological Pattern Research (PPR)™. LipoTyping, used for testing an individual's "fat type" is backed by 38 years of research and clinical practice. LipoCure has developed a safe, proven scientific method to repair the body's core dysfunctions and deficiencies in order to lose weight, reshape the body and promote wellness, bringing the body back into balance.

Cherie Arnold, President of LipoCure, LLC, has been involved in the wellness/medical spa and beauty industry for many years and has been praised for her ability to develop and market wellness solutions. In fact, Cherie's clients have said the following about her program:

"Very intelligent approach, this is the comprehensive program to address weight loss"

"I finally discovered my triggers to eating-that is invaluable!" "This ended my addiction to food, I dropped 2 pants sizes without trying"

"My body is reshaping and people are starting to see the difference, I feel an overall sense of wellbeing and people tell me I look radiant".

By following effective protocols and establishing the right "LipoType", LipoCure generates successful weight loss programs personalized for each individual and guarantees results.
